***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 8-9, 16, 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Kielmeyer (4545166).

Kielmeyer shows a ceiling system having a grid formed from a plurality of parallel extending main runners (10), a plurality of cross runners(70) extending between the main runners, each main runner having a vertical web (18) and a bulb portion (11), a plurality of compression struts (51) attached to the grid, a plurality of panels (50) resting within the grid, a plurality of clips (parts 39, 32, 30, 28, 24, 25 together forming a clip), each clip having a first leg (25), a second leg (39), a midportion (24, 29) disposed between the first and second leg, each first leg is in direct contact with and is secured to the vertical web of the main runner, each second leg is in direct contact with and is secured to the compression runner and each midportion conforms to the bulb portion of a main runner, the bulb portion being interposed between the compression strut and the mid-portion, the panels are downwardly accessible, the first leg (25) is secured to the main runner by a first fastening device (27), the second leg is secured to the strut by a second fastening device (figure 8, fastener).

Per claims 5, 16, Kielmeyer shows all the claimed structures. Kielmeyer's structure thus inherently would be able to meet an uplift classification 90 as claimed.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kielmeyer (4545166).

Kielmeyer shows all the claimed limitations except for the struts being attached to the runners by the clips at an interval of about 2 feet or at an interval of up to about 12 feet.

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Kielmeyer to show the struts being attached to the runners by the clips at an interval of about 2 feet or at an interval of up to about 12 feet because it would have been an obvious matter of engineering design choice to attach the struts to the runner at intervals of 2 feet or 12 feet as it is up to the designer to choose the desired fastening force between the struts and the runners for supporting the ceiling.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1, 5-9, 16, 22 have been considered but are moot in view of the new ground(s) of rejection.

With respect to applicant's argument that Kielmeyer does not show a compression strut as the strut disclosed has a different intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure

Art Unit: 3637

is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). The argument is thus moot.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
